Office Action Summary

Application No.

09/832,340

Applicant(s)

SCHILLER ET AL.

Examiner

Brian Q. Le

Art Unit

2623

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11/21/2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-10, 12 and 13 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-10, and 12-13 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 21 November 2005 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Response to Amendment and Arguments

1. Applicant's amendment filed November 21, 2005, has been entered and made of record.
2. Amended drawings for higher quality illustrations are accepted. If there are changes to the drawing, the Applicant is suggested to indicate the changes.
3. Applicant's arguments, see Remarks, filed November 21, 2005, with respect to the rejection(s) of claim(s) 1-2, 4-5, and 7-10 under 35 U.S.C. 102(b) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Rhee U.S. Patent No. 6,137,908.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-2, 4-5, and 7-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over the combination of Yamakita, Tooru EP 0 865 192 and further in view of Rhee U.S. Patent No. 6,137,908.

Regarding claim 1, Yamakita teaches a method comprising:

Receiving handwriting data (writing data on portable terminal) electronically from a remote user at a handwritten-information server (host device) (page 1, column 1), and
Processing the handwriting data in accordance with instructions provided to the server by the user (page 1, column 2). However, Yamakita does not explicitly teach the receiving of handwritten-information data in vector format, which represents handwriting motion captured

Art Unit: 2623

electronically. Rhee further teaches a handwriting recognition method further comprises the method of receiving handwritten-information in vector format representing handwriting motion captured electronically (receive handwriting input from pen/stylus in the form of x-y coordinate which clearly defined as vector by the Applicant, Remark, page 6) (column 3, lines 10-40).

Modifying Yamakita's method of processing handwriting according to would have been obvious for one skilled in the art to use vector (x, y coordinate) to capture motion of the handwriting and thus record handwriting information. This would improve processing and therefore, it would have been obvious to one of the ordinary skill in the art to modify Yamakita according to Rhee.

For claim 2, Yamakita further teaches the method which the handwriting data is generated using a handwriting device at the location of the remote user (portable terminal such as table for special pen/stylus) (page 1, column 1 and FIG. 2).

Regarding claim 4, Yamakita discloses method including performing handwriting recognition at the site of the remote user (page 1, column 2, first 2 lines).

For claim 5, Yamakita teaches the method including performing handwriting recognition at the handwritten-information server (character recognition at personal computer/host device) (column 1, lines 33-38).

For claim 7, Yamakita teaches the method which the handwriting data includes information identifying a destination of the handwriting data (page 2, column 2, lines 30-39).

Referring to claim 8, Yamakita further teaches the method which the processing of the handwriting data includes forwarding it to a destination (page 2, column 2, lines 30-39).

Also to claim 9, Yamakita teaches the method which the forwarding comprises sending the handwriting data in FAX format (page 8, column 13, lines 25-30).

Regarding claim 10, Yamakita teaches the method which the forwarding comprises sending the handwriting data as an email attachment or in a body of an email (content of a email) (column 2, lines 40-50).

6. Claims 3, 6 and 12-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over the combination of Yamakita, Tooru EP 0 865 192 and further in view of Rhee U.S. Patent No. 6,137,908 as applied to claim 3 above, and further in view of Lee U.S. Patent No. 5,347,477.

Regarding claim 3, Yamakita teaches the method which the handwriting data is generated by a special pen (page 2, lines 45-47). Yamakita does not explicitly teach wherein the pen can be electronic wireless pen. Lee further teaches a method processes handwriting wherein handwriting data is generated by an electronic wireless pen (column 3, lines 24-25 and FIG. 5). Modifying Yamakita's method of processing handwriting data according to Lee would able to provide a wireless pen in providing the wireless capability for the apparatus. This would improve processing and therefore, it would have been obvious to one of the ordinary skill in the art to modify Yamakita according to Lee.

For claim 6, please refer back to claim 3 for the limitation wherein transmitting the handwritten information wirelessly to a communication device (the concept of wireless pen). In addition, Yamakita teaches the method of including the location of the remote user, forming an electronic file representing the handwritten information (column 1, lines 13-17), and transmitting the electronically captured handwriting from the communication device to the handwritten-information server (page 1, column 1 and column 2).

For claim 12, please refer back to claims 3 and 6 for the teaching of wireless communication. In addition, Yamakita teaches the concept of storing (computer) (page 2, column 1, line 30).

Referring to claim 13, please refer back to claims 3, 6 and 12 for the teaching of wireless communication. Furthermore, Yamakita teaches a method providing an interactive user interface on a screen of a mobile device to enable a user to control functions (commands) applied (page 7, column 11, lines 39-47) to the stored handwriting information (simple interface) (page 2, column 2, lines 40-45).

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Art Unit: 2623

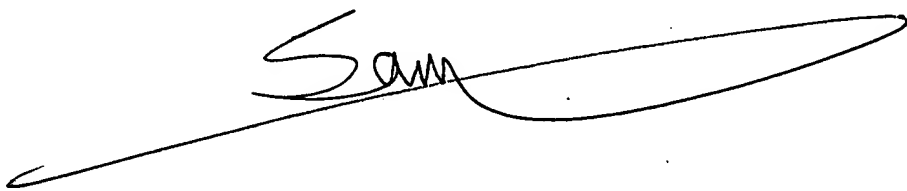

Contact Information

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian Q. Le whose telephone number is 571-272-7424. The examiner can normally be reached on 8:30 A.M - 5:30 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Mancuso can be reached on 571-272-7695. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
